

TEI Text Cheat Sheet

Element	Description
<abbr>	An abbreviation as it appears in the source. Pair with <expn> inside <choice>.
<add>	Text added by a scribe or annotator (e.g. interlinear or marginal addition). Use @place.
<am>	The abbreviation mark or symbol itself (e.g. a <i>linea</i>) inside <abbr>.
<catchwords>	The catchword(s) at the foot of a page, anticipating the next page's opening word(s).
<cb>	Marks a column beginning. Use @n for column number.
<choice>	Groups alternative encodings of the same text (e.g. <abbr>/<expn>, <sic>/<corr>, <orig>/<reg>).
<corr>	The editorially corrected form of an error. Pair with <sic> inside <choice>.
<damage>	Text affected by physical damage (stain, hole, fading). Use @agent, @extent.
	Text marked as deleted or struck through by a scribe. Use @rend.
<div>	A structural division of the text (e.g. a chapter, section).
<expn>	The expanded form of an abbreviation. Pair with <abbr> inside <choice>.
<ex>	Editorially supplied letters expanding an abbreviation, inside <expn>.
<figDesc>	A description of a figure or illustration.
<figure>	A figure, diagram, or illustration in the source.
<foreign>	A word or words in a language other than the main text language. Use @xml:lang.
<fw>	"Forme work": running title, catchword(s), or page/quire signature(s) outside the main text block.
<gap>	An omission in the transcription (e.g. illegible or deliberately not transcribed). Use @reason, @extent.
<handShift>	Marks a change from one scribal hand to another.
<head>	A heading or title within the text, e.g. for a <div>.
<l>	A verse line.
<lb>	Marks a line beginning. Use @n for line number.
<lg>	A group of verse lines (e.g. a stanza).
<milestone>	Any reference point not tied to textual structure. Use @unit.
<p>	A paragraph.
<pb>	Marks a page beginning. Use @n for folio/page number, @facs to link an image.
<seg>	An arbitrary segment of text, for grouping without implying a structure.
<sic>	The erroneous form as it stands in the source. Pair with <corr> inside <choice>.
<space>	A blank space left in the source. Use @extent.
<supplied>	Text supplied by the editor where the source is illegible, damaged, or omitted. Use @reason.
<unclear>	Text that has been transcribed with uncertainty. Use @cert.

For further details, including on elements and attributes not listed here, see the full TEI guidelines at: <https://tei-c.org/release/doc/tei-p5-doc/en/html/index.html>
